REPLY TO  
ATTN OF: DEEV

SUBJECT: Installation Restoration Program Site SS-011 Engineering Evaluation/Cost Analysis

TO: US Environmental Protection Agency (EPA)  
Region II  
ATTN: Mr. Jeffrey Gratz  
26 Federal Plaza, EERD - Room 2930  
New York NY 10278

1. Enclosed are three copies of the Site SS-011 (Defense Reutilization and Marketing Office) Engineering Evaluation/Cost Analysis (EE/CA) for the dichloro-diphenyl-trichloroethane (DDT) contaminated soil removal action at Plattsburgh Air Force Base (AFB). The enclosed documents are provided for 30-day regulatory review and comment.
2. The purpose of the Site SS-011 EE/CA is to identify removal action objectives for the DDT contaminated material at DRMO, evaluate removal alternatives for this material, and recommend a preferred removal alternative. The recommended alternative for this removal action is the excavation of soils containing concentrations of DDT above 10 parts per million (ppm), off-site disposal in a permitted landfill, and off-site incineration of material containing greater than or equal to 1000 ppm of DDT.
3. Any questions can be directed to either Rachel Becker or Phil Von Bargen, (518) 565-5683.
